Art Unit: 2653

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Applicant's election without traverse of Group I, claims 1-5, in Paper No. 8 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Gage et al. (USP-5,796,688).

Gage et al discloses a recording/reproducing apparatus for an optical information recording medium having a plurality of recording layers. The recording/reproducing apparatus includes a plurality of optical heads 21a & 21b provided on the same side with respect to the recording medium and the plurality of optical heads are assigned to reproduced information from or record information in different recording layers respectively. See figure 3.
